DETAILED ACTION

Claim Objections

Claims 39-41 are objected to because of the following informalities: They depend on a cancelled claim (claim1). Examiner believes that applicant intends to have these claims depend on claim 38 and will examine accordingly. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 38, 39, and 41-43 are rejected under 35 U.S.C. 102(e) as being anticipated by Whalen et al. Whalen discloses a catheter assembly having a source of mechanical motion which engages with an elongate member which comprises a wire. This motion source also provides different types of motion, including rotational and translational. This reference goes on further to

describe a method of operation for the catheter assembly. (See column 4 lines 12-18, column 6 lines 46-57, column 18 line 46- column 19 line 18)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 40 is rejected under 35 U.S.C. 103(a) as being unpatentable over Whalen et al. as applied to claim 38 above, and further in view of Summers. While Whalen discloses information concerning the vibrational motion along the axis of the wire member, it is silent concerning the relative amounts of motion along that member. In analogous art, Summers shows a catheter containing an element for delivering motion in a reciprocating, rotating and oscillating manner, this reference goes on to show the use of a brace to support the shaft so that vibration in the shaft or proximal end is less than the vibration in the treatment, or distal end. (See column 2 lines 63-66, column 3 lines 59-68)

Therefore it would have been obvious to one skilled in the art at the time of the invention to modify Whalen's device with the teaching of Summers in order to provide a device for dislodging obstructive materials using the motion of a wire that has greater vibrational motion at its treatment end than at its attachment end, engaging with the shaft extension.

Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in ABANDONMENT of the application.
